

MUHAMMED BASIM EISA

Penetration Tester

mohammadthunder10@gmail.com • [Linkedin](#) • [+201003009930](#) • Egypt

Career Objective

Aspiring web application penetration tester with hands-on training from Hack The Box and PortSwigger Web Security Academy, along with practical exposure through bug bounty programs. Familiar with identifying vulnerabilities such as SQL injection and access control issues, and interested in real-world exploitation techniques. Eager to learn, contribute, and grow within a professional security team.

Education

B.Eng. in Electrical & Computer Engineering, Menufiya University

[2020 - present]

Faculty of Engineering

Work Experience

Web Application Penetration Testing (Self-Study & Practice)

2024 - present

- Practiced web application security through labs on Hack The Box and PortSwigger Web Security Academy
- identified and exploited vulnerabilities such as SQL injection and broken access control in controlled environments
- Participated in bug bounty programs, analyzing real-world applications for potential security issues
- Developed understanding of HTTP requests, authentication mechanisms, and common attack vectors

Front-End Development

August 2021 - February 2022

- Built responsive web interfaces using HTML, CSS, and JavaScript
- Developed small-scale projects focusing on UI structure, styling, and interactivity
- Completed front-end development related certifications from udacity through participating in EGFWD initiative
- Gained foundational knowledge of how web applications function from a client-side perspective

IoT Training Program, ITI

- Participated in a basic Internet of Things (IoT) training program
- Worked with simple hardware setups
- Gained exposure to the integration between hardware and software systems

Projects

Weather-Journal App

- Developed a Weather Journal web application that consumes the OpenWeatherMap API to fetch and display real-time weather data. Implemented dynamic content generation, including temperature-based GIFs and contextual weather messages, to create an engaging and personalized user experience.

Responsive Landing Page

- The project is a about landing page with several sections added to it dynamically with JavaScript and it is also responsive for different devices (phones,tablets,computers etc..)
- Easily modifiable and no bad dependencies
